

Education

Thomas Jefferson University, Philadelphia, PA	Sep 2015
Ph.D. in Neuroscience, Thesis Lab : Dr. Michael Oshinsky & Dr. Melanie Elliott	
Honors College of Drexel University, Philadelphia, PA	June 2008
Bachelor of Science in Biological Sciences (minor in Mathematics)	

Honors & Awards

Lilly Innovation Fellowship Award (LIFA) Finalist	2017	TJU Alumni Travel Grant (\$1,000)	2014
Jefferson JCBS Alumni Thesis Award	2016	American Headache Society Travel Grant (\$1,500)	2013
North American Pain School Trainee (\$1,500 Stipend)	2016	Seahorse Bioscience Travel Grant (\$1,500)	2012
North American Pain School Pain Research Forum Correspondent	2016	TJU Alumni Travel Grant (\$1,000)	2014
New Headache Investigator Research Tournament Winner	2015	AAAS Mass Media Science & Engineering Fellows Finalist	2011
International Headache Academy Young Investigator	2015	Leopold Schepp Foundation Grant (\$20,000)	2010 - 2011
NIH Pain Consortium Symposium Travel Grant (\$1,000)	2014	1 st prize in College of Arts & Science Research Day	2008
CLS Capitol Hill Day Travel Grant (\$1,000)	2014	Featured in Drexel Alumni Donor Magazine article	2008
Hosted Congressman Charlie Dent for tour of TJU	2014	Leopold Schepp Foundation Scholarship (\$20,000)	2007 - 2008
Fredric Rieders Renaissance Foundation Graduate Student Award	2014	TriBeta-BIO Honor Society	2007 - 2008
		National Society of Collegiate Scholars	2004 - 2008

Research/Training Support

NIH IRACDA K12 PENN-PORT Postdoctoral Fellowship (K12 GM081259) (\$190,488) "Determining the role of fibroblasts in chronic pain and migraine"	2016 - 2019
Thomas Jefferson Headache Center Miles for Migraine Grant (\$15,000 collaborative project between TJU & UPENN) "Investigating the role of non-peptidergic C-fiber nociceptors in Post-Traumatic Headache"	2016
NIH Mentoring Junior Investigators in Alcohol Research Fellowship (T32 AA007463) (\$105,300) "Mitochondrial Dysfunction & Adenosine Signaling in Delayed Ethanol-Induced Headache"	2012 - 2015

Publications

- Fried NT**, Elliot MB, Oshinsky ML. "The Role of Adenosine Signaling in Headache: a Review." *Brain Sci. The Pathogenesis and Treatment of Headache Disorders special issue* 2017, 7(3), 30.

| 7. Thomas Jefferson University Headache Clinicians Meeting. "Mitochondrial and Migraine: Potential Therapeutic Targets." | 2014 |

Research Experience

University of Pennsylvania, Philadelphia, PA

Postdoctoral Fellow, October 2015 to Present

- Utilized mouse genetics, neuronal tracing, virus injection, optogenetics, and behavior to investigate central and peripheral brain circuitry of pain.
- As an Institutional Research and Academic Career Development Award PENN-PORT Fellow, trained to design and teach college-level courses in minority-serving institutions throughout the Philadelphia region. These responsibilities are balanced with a full-time research program.
- Directly mentored high school, college, and graduate students on independent research projects.

Thomas Jefferson University, Philadelphia, PA

PhD Candidate, September 2010 to September 2015

- Designed, implemented, and analyzed rodent studies using neuropharmacology, electrophysiology, behavior, and cellular biology techniques to investigate pathophysiology behind migraine, headache, and post-traumatic headache.
- Directly designed research proposals and consulted with multiple large and small pharmaceutical & biotechnology companies to test mechanisms of action and efficacy of novel drug candidates and medical devices on multiple rat models of trigeminal pain in the treatment of migraine headache.

Drexel University, Philadelphia, PA

Research Lab Manager/Web Developer, August, 2008 to August, 2010

- Provided technical support/troubleshooting for the Cell Imaging Center, Flow Cytometry Center, and the RNAi Resource Center as a lab manager.
- Designed, Developed, & Implemented Websites for the Department of Biology.
- Communicated various accomplishments and news about the Department of Biology to the University community and the Philadelphia area.

Drexel University, Philadelphia, PA

Student Research Assistant with Dr. Aleister Saunders, April 2005 to June 2008

- Transfected HDAC shRNA into APP-Gal4-SY5Y cell lines to investigate potential effects on Amyloid beta plaque levels.
- Developed methods of Amyloid beta subtype separation using Electrophoresis and Mass Spectrometry.
- Performed mini-preps and restriction digestion on shRNA mediated RNAi samples for investigation of genes associated with Alzheimer's Disease.
- Maintained and harvested cell lines: SH-SY5Y, HEK293, and APP-Gal4-SY5Y stables.

Centocor, Radnor, PA

Co-op/Assistant Scientist, September, 2005 to April, 2007

- Investigated cell marker stability and density in whole blood with flow cytometry and analyzed with cell quest pro.
- Measured cytokines from human peripheral blood mononuclear cell cultures to determine mechanisms of therapeutic monoclonal antibodies.
- Created validation report to confirm fixative tube effectiveness in preserving biomarkers in active states for clinical application in future studies.
- Performed various cell based techniques in a GLP laboratory including Flow Cytometry, ELISPOT, Immunofluorescent Staining, Cell Culture, NTX assays, CTX assays, and PBMC Isolation in order to investigate Pharmacodynamic response of an investigatory drug.

Baxter Healthcare, Cherry Hill, NJ

Co-op/QC Chemist, September, 2004 to April, 2005

- Confirmed purity of drugs in a Good Manufacturing Practicing Laboratory using HPLC & GC systems and various wet chemistry techniques.

Rotation Experience

Dr. Kyunghye Koh, TJU, Circadian Rhythms

- Summary: I worked to help characterize a novel circadian rhythm gene's molecular interactions utilizing GST-pull down assay. I also designed and created a never before produced courtship chamber for behavioral analysis.
- Techniques Acquired: fly genetics with gs-driver and UAS-GAL4 system, fly pushing, fly brain dissection, fly behavior including courtship assay and IR rhythmicity analysis, western blot and protein purification, GST-pull down assay, PCR, courtship assay.

Dr. Jeannie Chin, TJU, Homeostatic Plasticity in Alzheimer's Disease & Seizure

- Summary: I studied the response patterns of proteins (cfos, calbindin, vglut, NavB2) within the entorhinal cortex and hippocampus in an AD mouse model to study the homeostatic changes and the correlations between seizure activity and Alzheimer's Disease.
- Techniques Acquired: EEG implantation and surgery in mice, mouse perfusion and brain extraction, immunohistochemistry on brain slices, mouse brain slice preparation, fluorescence microscopy of the hippocampus and entorhinal cortex, IP injection of kainic acid, seizure scoring.

Dr. Matthew Dalva, UPENN, Synaptogenesis

- Summary: I studied the interaction between PSD95 and presynaptic EphB2 in the trans-synaptic Eph/ephrin synaptic adhesion protein interaction that may control synapse density in the developing brain.
- Techniques Acquired: synaptosome prep from fresh mouse brain, mouse brain extraction, immunoprecipitation, western blot, gel preparation, mouse care, cell culture, transfection of rna1 in HEK293 cells, PCR.

Teaching Experience

Rutgers University, Camden, NJ

Visiting Professor, Fall 2017 & Spring 2018

- Designed a new special topics 3-credit course for undergraduate and graduate students as a Penn-PORT IRACDA fellow. This involved designing lecture material, assessments, learning objectives, and in-class activities. This course was team-taught with a Penn-PORT colleague and closely mentored by an Associate Professor of Biology.
- The course was titled "Neuropharmacology: Sensory Systems, Addiction, and Society" and focused on pain pathways and how chronic pain has contributed to the opioid epidemic across South Jersey and the country.

Delaware County Community College, Media, PA

Visiting Professor, Spring & Fall 2017

- Designed and delivered lecture material and student assessments as a Penn-PORT IRACDA fellow for the 4-credit Anatomy & Physiology I course.
- Shadowed Associate Professor for Anatomy & Physiology courses during spring 2017. This involved designing and delivering lectures, tests, and laboratory activities while obtaining one-on-one training.
- Worked closely with faculty and students to identify unique characteristics of student population to provide enhanced mentorship and training to students from diverse backgrounds.

Thomas Jefferson University, Philadelphia, PA

Mathematics Instructor & Physics Teaching Assistant, August 2013 to Present

- Developed and presented math review classes for 50+ students in the Post-Bach program. This review is provided twice a year.
- Instructed, graded, supported, and designed laboratories as a teaching assistant for Physics I & II from August 2013 – June 2014.

Journalism Experience

Pain Research Forum & RELIEF at the International Association for the Study of Pain (IASP), Freelance Science Journalist, June 2016 to Present

- Wrote stories about recent discoveries in pain research for basic science researchers & clinicians in Pain Research Forum and the public in RELIEF.
- Performed phone interviews with those involved in studies and those who were not to create a well-balanced and informed story of recent findings.
- These two resources are accessed by the leading clinicians and basic scientists in the pain community.

Cactus Communications, Freelance Science Copy Editor, February 2016 to September 2016

- Edited scientific manuscripts for ESL researchers across the globe. Featured as worldwide top-ten most productive editor in the neuroscience group.

American Association for Cancer Research, Freelance Science Writer, June 2014 to June 2015

- Reviewed scientific manuscripts to write *Research Watch* and *In This Issue* summaries for the AACR peer-reviewed journal, *Cancer Discoveries*.

Integrative Academic Solutions, Columnist, March 2013 to June 2014

- Featured a number of articles regarding how skill-sets developed outside of graduate school are essential for success on or off the bench.

The Neuron Project, Editor in Chief, 2011 to 2014

- Designed, developed, and founded an online neuroscience magazine for fellow graduate students to write about current findings in neuroscience.

SFN's NeurOnline, Champion Writer, 2011 to 2012

- Led discussions about history, teaching, public awareness, and societal impact of neuroscience.

National Institute of Neurological Disorders and Stroke, Content Editor, 2011

- Edited and wrote descriptions of migraine-related disorders.

The Triangle, Drexel Student Newspaper, Lead Scientific Writer, 2009

- Wrote featured articles about current findings in research labs across engineering and biological sciences.

Scientific Memberships

National Postdoc Association	2016-Present	American Association for the Advancement of Science	2012-Present
National Research Mentoring Network	2016-Present	Society for Neuroscience	2010-Present
Sigma Xi	2013-Present	Intern. Association for the Study of Pain Trainee Member	2016-2017
International Headache Society	2013-Present	Research Society on Alcoholism	2013-2015
American Headache Society	2013-Present	AJ Drexel Institute of Basic & Applied Protein Science	2004-2008

Positions Held in Organizations

- Webmaster & Student/Postdoc Liaison for the Philadelphia Chapter of SFN 2011 - Present
- Standing member on the Publications committee in the Research Society on Alcoholism 2013 - 2015
- Founding member of the Thomas Jefferson University Business and Biotech Group (BizBio) 2012 - 2014
- VP of Career Development, Graduate Student Association 2012 - 2014
 - Organized annual Speed Networking Events with 50+ students and 15 representatives in various scientific careers.
- Graduate Student Liaison for TJU Neuroscience Department 2011 - 2013
- President of NSCS Honor Society Drexel Chapter September 2006 - 2008
- Vice President of NSCS Volunteer Activities 2006

Activities & Volunteer Work

- Academic reviewer at PLOS ONE, Cephalalgia, Journal of the Neurological Sciences, Cellular Physiology and Biochemistry 2016 - Present
- Volunteer at the Carolina Cannabinoid Collaborative Conference 2016
- Tutoring mathematics, physics, neuroscience, biology, and genetics 2008 - 2016
- Bioko Biodiversity Protection Program; Bioko Island, Equatorial Guinea 2010
- Archelon: Sea Turtle Protection Society of Greece Volunteer; Peloponnese, Greece 2008
- Three month expedition, navigation, and research of Sargasso Sea by Sail 2008
- Volunteer at Franklin Institute Interpretive Services Department 2004

Science and Diversity Outreach Work

- Invited speaker at TimeCamp001 science fiction conference hosted by Afrofuturist Affair, "How the brain perceives time." 2017
- Invited speaker at Philadelphia Science Festival's Sensory Overload at Yard's Brewery, "Synesthesia, LSD, and the rewiring of our senses." 2017
- Guest speaker at Washington Township High School, "Alcohol, the Brain, and Migraines" 2017
- Resident Neuroscience Expert with NeuroNewsNight monthly Twitter Chat 2016
- Guest speaker at Lincoln University (HBCU) grad school workshop, "Insider secrets for getting into grad & med school!" 2016
- Poster judge for Penn Honors Diversity Symposium 2016
- Co-organized graduate school prep day for Penn's Summer Undergraduate Internship Program 2016
- Philadelphia Brain Health Fair 2014
- Coalition for the Life Sciences Capitol Hill Day 2014
- SFN Brain Week activities 2011 - 2014

Special Classes

- College and University Teaching Seminar (focused on developing teaching philosophy and teaching at a university level), PENN 2017
- HHMI-BioInteractive Teaching Workshop, PENN 2016
- Biotechnology Venture Management Class, TJU 2012

Independent Research Students Mentored

- Undergraduate student (Swarthmore College) 2017 - 2018
- High school student (Friend's Central) 2016 - 2017
- High school student (Science Leadership Academy) 2016 - 2017
- PhD rotation student (University of Pennsylvania) 2016
- Undergraduate student (Williams College) 2016
- High school student (Downingtown STEM Academy) 2016
